

Free Market Data API Endpoints and Limits (Alpaca, Alpha Vantage, FRED, Finnhub, FMP, Polygon.io)

This report lists the **specific REST endpoints (or SDK method names)** that can be accessed on each provider's **free plan**, along with known usage limits. Endpoints requiring a paid upgrade are excluded. Use the cited sources to verify rate limits and available features.

Alpaca

Alpaca's free **Basic** plan restricts market-data access to the **IEX** feed (limited to IEX-listed equities) and an **indicative options feed**. SIP/CTA feeds and other exchanges are paid features ¹. Global REST rate limit is ~200 requests/min; WebSocket streaming is limited to 30 symbols ².

Equity data endpoints

Endpoint (HTTP path or SDK method)	Description	Notes
GET /v2/stocks/bars	Retrieve historical bars for one or more tickers (1 min up to daily).	IEX-only; 1 year retention on free plan.
GET /v2/stocks/trades	Historical trades for specified tickers and time range.	Only IEX symbols.
GET /v2/stocks/quotes	Historical quotes (bid/ask) for specified tickers and time range.	IEX only.
GET /v2/stocks/snapshots	Snapshot of latest trade, quote, minute bar and daily bar for multiple tickers.	IEX only.
GET /v2/stocks/bars/latest?symbols=	Latest minute/daily bar per ticker.	—
GET /v2/stocks/quotes/latest?symbols=	Latest bid/ask per ticker.	—
GET /v2/stocks/trades/latest?symbols=	Latest trade per ticker.	—
GET /v2/stocks/{symbol}/corporate_actions/announcements	Corporate actions (splits, dividends) for symbol.	—

Endpoint (HTTP path or SDK method)	Description	Notes
<code>GET /v2/stocks/{symbol}/fundamentals</code>	Company fundamentals (logo, description, market cap).	—
<code>GET /v2/stocks/{symbol}/news</code>	Company news articles and summaries.	—

Options data endpoints (indicative feed)

Endpoint	Description	Notes
<code>GET /v2/options/chain/{underlying}</code>	List available option contracts for an underlying symbol.	Only indicative feed.
<code>GET /v2/options/bars</code>	Historical OHLC bars for option contracts.	Free plan limited to indicative data.
<code>GET /v2/options/trades</code>	Historical trades for option contracts.	Free feed; limited depth.
<code>GET /v2/options/quotes</code>	Historical bid/ask for option contracts.	—
<code>GET /v2/options/snapshots</code>	Latest trade, quote, greeks for option contracts.	—
<code>GET /v2/options/greeks</code>	Historical implied volatility, delta, gamma, theta, vega.	Indicative; free plan.

Crypto, forex and other data

Endpoint	Description
<code>GET /v2/crypto/bars</code> / <code>trades</code> / <code>quotes</code>	Historical bars, trades and quotes for crypto pairs.
<code>GET /v2/forex/bars</code> / <code>trades</code> / <code>quotes</code>	Historical FX bars, trades and quotes (major pairs).
<code>GET /v2/crypto/snapshots</code> , <code>GET /v2/forex/snapshots</code>	Latest trade, quote and bars for multiple symbols.
<code>GET /v2/reference/symbols</code>	List available crypto or forex symbols.

Concurrency / request limits

- REST endpoints: ~**200 requests per minute** per account (general guideline, not published).
- Streaming via WebSocket: **30 symbols max** on free plan ² .

Alpha Vantage

Alpha Vantage organizes its API by **function** parameter. Free plan allows **5 requests/minute and 500 requests/day** (per API key), while premium tiers raise these limits. Only functions not labelled “Premium” can be used without payment.

Stock time-series functions

Function (<code>function=</code> value)	Description
<code>TIME_SERIES_DAILY</code> , <code>TIME_SERIES_DAILY_ADJUSTED</code>	Daily OHLC prices; adjusted version includes splits/dividends.
<code>TIME_SERIES_WEEKLY</code> , <code>TIME_SERIES_WEEKLY_ADJUSTED</code>	Weekly OHLC/volume.
<code>TIME_SERIES_MONTHLY</code> , <code>TIME_SERIES_MONTHLY_ADJUSTED</code>	Monthly OHLC/volume.
<code>TIME_SERIES_INTRADAY</code>	Intraday OHLC at 1-,5-,15-,30- and 60-minute intervals. Updates end-of-day only on free plan ³ .
<code>GLOBAL_QUOTE</code>	Returns latest price, volume and change for one ticker.
<code>SYMBOL_SEARCH</code>	Search equities by keyword.
<code>SECTOR</code>	Current and historical S&P 500 sector performance.

Options and derivative data

Function	Description
<code>HISTORICAL_OPTIONS</code>	Returns complete options chain for a given ticker and expiration date, including greeks ⁴ .
<code>REALTIME_OPTIONS</code>	Real-time options data (premium).

Fundamental data

Function	Description
<code>OVERVIEW</code>	Company overview with name, description, sector, market cap and more.
<code>INCOME_STATEMENT</code> , <code>BALANCE_SHEET</code> , <code>CASH_FLOW</code>	Annual/quarterly financial statements.

Function	Description
<code>EARNINGS</code> , <code>EARNINGS_CALENDAR</code>	Annual/quarterly EPS and revenue; upcoming earnings calendar.
<code>LISTING_STATUS</code>	List of symbols with IPO status and delisting status.
<code>IPO_CALENDAR</code>	Upcoming IPOs.

Currency and crypto

Function	Description
<code>CURRENCY_EXCHANGE_RATE</code>	Real-time exchange rate between any two currencies.
<code>FX_DAILY</code> , <code>FX_WEEKLY</code> , <code>FX_MONTHLY</code>	Foreign-exchange time series (daily/weekly/monthly).
<code>DIGITAL_CURRENCY_DAILY</code> , <code>DIGITAL_CURRENCY_WEEKLY</code> , <code>DIGITAL_CURRENCY_MONTHLY</code>	Crypto time series vs. USD and other currencies.
<code>CRYPTO_RATING</code>	Crypto rating and risk metrics.

Alpha Intelligence functions (free/trending)

Function	Description
<code>NEWS_SENTIMENT</code>	Real-time and historical news articles with sentiment scores ⁵ .
<code>EARNINGS_CALL_TRANSCRIPT</code>	Earnings call transcript and sentiment ⁶ .
<code>TOP_GAINERS_LOSERS</code>	Top 20 gainers/losers; real-time requires premium ⁷ .
<code>INSIDER_TRANSACTIONS</code>	Insider trade data for a ticker ⁸ .
<code>ADVANCED_ANALYTICS</code>	Compute statistics (mean, variance, cumulative return, covariance, correlation) for up to 5 symbols ⁹ .
<code>TECHNICAL_INDICATORS</code> (various values: <code>SMA</code> , <code>EMA</code> , <code>MACD</code> , <code>RSI</code> , <code>BBANDS</code> , etc.)	Dozens of technical indicators; each indicator has its own function name.

Usage limits

- **5 requests per minute** and **500 requests per day** on the free tier (across all functions).
- Each function call counts as one request, regardless of the number of symbols requested.
- Some endpoints (e.g., intraday) return compact results by default; full results may require multiple requests.

FRED (Federal Reserve Bank of St. Louis)

The FRED API is entirely free; there are no paid endpoints. You must register for a key. Rate limit is **120 requests per minute** per IP (informal guideline). Key endpoints are grouped by categories, releases, series, sources and tags ¹⁰.

Categories

Endpoint	Description
<code>/fred/category</code>	Get a FRED category by ID.
<code>/fred/category/children</code>	Child categories of a specified category.
<code>/fred/category/related</code>	Related categories.
<code>/fred/category/series</code>	Series in a category.
<code>/fred/category/tags</code> , <code>/fred/category/related_tags</code>	Tags for a category and related tags.

Releases

Endpoint	Description
<code>/fred/releases</code>	List all FRED releases.
<code>/fred/release</code>	Get a specific release by ID.
<code>/fred/release/dates</code>	Dates of a release.
<code>/fred/release/series</code>	Series in a release.
<code>/fred/release/sources</code>	Sources for a release.
<code>/fred/release/tags</code> , <code>/fred/release/related_tags</code>	Tags for a release.

Series

Endpoint	Description
<code>/fred/series</code>	Metadata for a FRED series.
<code>/fred/series/observations</code>	Time-series observations (dates & values).
<code>/fred/series/search</code>	Search series by text.
<code>/fred/series/categories</code>	Categories containing a series.
<code>/fred/series/updates</code>	Recently updated series.

Endpoint	Description
<code>/fred/series/vintagedates</code>	Available vintage dates for a series.

Sources and tags

Endpoint	Description
<code>/fred/sources</code> , <code>/fred/source</code>	List all sources and get a single source.
<code>/fred/source/releases</code>	Releases from a source.
<code>/fred/tags</code> , <code>/fred/related_tags</code>	Search tags and related tags.
<code>/fred/series/tags</code> , <code>/fred/series/related_tags</code>	Tags for a series and related tags.

Limits

- Approximately **120 requests/minute** per IP; contact FRED for higher usage.

Finnhub

Finnhub's documentation marks each endpoint as **Premium** (paid), **High Usage** (available on free plan but heavy), or **New**. Free users can call any endpoint without the "Premium" tag. The free plan includes **60 API calls/minute** overall, **900 calls/minute** for market-data endpoints and **300 calls/minute** for fundamental data ¹¹.

Below is a non-exhaustive list of free endpoints (all are `GET` unless specified). Endpoints tagged *Premium* in Finnhub docs are omitted.

Stock fundamentals

Endpoint	Description
<code>/stock/symbol</code>	List supported stock symbols.
<code>/search</code>	Symbol lookup by keyword.
<code>/stock/profile2</code>	Company profile (name, industry, logo).
<code>/stock/peers</code>	Peer companies for a given symbol.
<code>/stock/metrics</code>	Basic financial metrics (PE ratio, PB ratio, etc.).
<code>/stock/insider-transactions</code>	Insider trade records.
<code>/stock/insider-sentiment</code>	Insider sentiment scores.

Endpoint	Description
<code>/stock/financials-reported</code>	Raw financial statements (as reported).
<code>/stock/financials?symbol=</code>	Standardized financial statements (Free up to 5 years).
<code>/stock/candle</code>	Historical OHLCV candles (free plan supports daily candles; intraday intervals may be limited).
<code>/stock/split</code>	Stock split history.
<code>/stock/dividend</code>	Dividend history.
<code>/stock/quote</code>	Real-time quote (latest price, bid/ask, volume).
<code>/stock/market-news</code>	Market-wide news articles.
<code>/company-news</code>	Company-specific news for a given symbol and date range.
<code>/news-sentiment</code>	News sentiment for top companies.
<code>/stock/ownership</code>	Insider share ownership (basic list).
<code>/stock/financials-as-reported</code>	Full 10-K/Q filings.
<code>/stock/filings</code>	SEC filings list.
<code>/stock/executive-compensation</code>	CEO compensation (free).
<code>/stock/recommendation</code>	Analyst recommendation trends.
<code>/stock/eps-surprise</code>	EPS surprises by quarter.
<code>/stock/earnings-calendar</code>	Upcoming earnings calendar.
<code>/stock/earnings</code>	Historical earnings by quarter.
<code>/stock/splits</code>	Stock split history.
<code>/stock/ipo-calendar</code>	Upcoming IPOs.
<code>/stock/sectors-performance</code>	Sector performance data.
<code>/stock/market-status</code>	Current market status (open/closed).
<code>/stock/market-holiday</code>	List of market holidays.
<code>/stock/target-price</code>	Analyst price targets (limited).

ETF, indices, mutual funds

These endpoints are free:

Endpoint	Description
<code>/etf/profile</code>	ETF profile (name, assets, expense ratio).
<code>/etf/sector</code>	ETF sector exposure.
<code>/etf/holdings</code>	ETF holdings (limited to top positions on free plan).
<code>/index/symbol</code>	List index symbols (e.g., SPX, NDX).
<code>/index/constituents</code>	Index constituents.
<code>/index/candle</code>	Index candle data (free for major indices).

Forex and crypto

Endpoint	Description
<code>/forex/exchange</code>	List forex exchanges.
<code>/forex/symbol</code>	List forex symbols.
<code>/forex/candle</code>	Historical forex candles (daily).
<code>/crypto/exchange</code>	List crypto exchanges.
<code>/crypto/symbol</code>	List crypto symbols.

Alternative data (free)

Finnhub labels several alternative datasets as “New” and free:

- `/patents` – USPTO patent applications and assignments (sorted by company or keyword).
- `/visa-application` – U.S. visa application data.
- `/lobbying` – U.S. senate lobbying disclosures.
- `/us-spending` – U.S. government contract spending.
- `/investment-themes` – Lists investment themes and associated tickers.

Rate limits

- **60 requests/minute** overall; **900 requests/minute** for market data and **300 requests/minute** for fundamental data ¹¹.
- Additional 30 requests/second cap per IP.
- WebSocket streaming limited to 50 symbols ¹².

Financial Modeling Prep (FMP)

FMP's free tier offers a vast set of endpoints with **250 requests/day** ¹³ ; some endpoints support only U.S. securities. Premium endpoints are clearly marked in the docs; the free endpoints are summarised below.

Stock and directory endpoints

Endpoint	Description
<code>/api/v3/search?query=</code>	Search company names and tickers.
<code>/api/v3/stock/list</code>	List all stock symbols supported (company symbol list).
<code>/api/v3/financial-statement-symbol-list</code>	List symbols that have financial statements.
<code>/api/v3/cik-list?page=0&limit=1000</code>	List Central Index Key numbers.
<code>/api/v3/symbol-change?from=...&to=...</code>	List ticker symbol changes.
<code>/api/v3/etf/list</code>	List ETF symbols.
<code>/api/v3/actives</code>	List actively trading stocks.
<code>/api/v3/earning_call_transcript/list</code>	List tickers with earnings transcripts.
<code>/api/v3/exchanges-list</code> , <code>/api/v3/sectors</code> , <code>/api/v3/industries</code> , <code>/api/v3/countries</code>	Lists available exchanges, sectors, industries and countries ¹⁴ .

Company information

Endpoint	Description
<code>/api/v3/profile/{symbol}</code>	Company profile (name, description, sector, industry, website, CEO).
<code>/api/v3/company/profile/{cik}</code>	Profile by CIK.
<code>/api/v3/company/notes/{symbol}</code>	Company notes/press releases.
<code>/api/v3/company/peers/{symbol}</code>	Peer comparison.
<code>/api/v3/delisted-company</code>	List of delisted companies.
<code>/api/v3/market-cap/{symbol}</code> / <code>/api/v3/batch-market-cap</code> / <code>/api/v3/historical-market-cap/{symbol}</code>	Current, batch and historical market cap.
<code>/api/v3/share-float/{symbol}</code> / <code>/api/v3/all-shares-float</code>	Share float and liquidity data.

Endpoint	Description
<code>/api/v3/mergers</code> / <code>/api/v3/mergers-search?symbol=</code>	Recent mergers and acquisitions.
<code>/api/v3/executives/{symbol}</code>	Company executives and compensation.
<code>/api/v3/executive-compensation/{symbol}</code>	Executive pay data.
<code>/api/v3/executive-benchmark</code>	Compensation benchmark.

Quotes and price data

FMP has numerous quote endpoints; all are `GET`:

Endpoint	Description
<code>/api/v3/quote/{symbol}</code>	Real-time stock quote (price, change, volume).
<code>/api/v3/quote-short/{symbol}</code>	Lightweight quote with fewer fields.
<code>/api/v3/after-market-trade/{symbol}</code>	After-market trade price.
<code>/api/v3/after-market-quote/{symbol}</code>	After-market quote.
<code>/api/v3/stock-price-change/{symbol}</code>	Percent change for a stock.
<code>/api/v3/quotes/{exchange}</code>	Batch quotes by exchange (e.g., NASDAQ, NYSE).
<code>/api/v3/quotes/mutual-fund</code> , <code>/api/v3/quotes/etf</code> , <code>/api/v3/quotes/commodity</code> , <code>/api/v3/quotes/crypto</code> , <code>/api/v3/quotes/forex</code>	Quotes for mutual funds, ETFs, commodities, cryptocurrencies and forex pairs ¹⁴ .
<code>/api/v3/stock/price?symbol=</code>	Current price (deprecated but still working).

Financial statements and metrics

Endpoint	Description
<code>/api/v3/income-statement/{symbol}</code>	Annual and quarterly income statements (supports <code>period=annual</code> or <code>quarter</code>).
<code>/api/v3/balance-sheet-statement/{symbol}</code>	Balance sheet data.
<code>/api/v3/cash-flow-statement/{symbol}</code>	Cash-flow data.

Endpoint	Description
<code>/api/v3/income-statement/{symbol}?period=ttm</code>	Trailing-12-month data.
<code>/api/v3/ratios/{symbol}</code>	Financial ratios (P/E, ROE, etc.).
<code>/api/v3/key-metrics/{symbol}</code>	Key metrics (EBITDA, EV, dividends, etc.).
<code>/api/v3/enterprise-values/{symbol}</code>	Enterprise value and EV/EBITDA.
<code>/api/v3/advanced-stats/{symbol}</code>	Advanced statistics (beta, shares outstanding, etc.).
<code>/api/v3/historical-dividend/{symbol}</code>	Dividend history.
<code>/api/v3/stock-dividend/{symbol}</code>	Upcoming dividends.
<code>/api/v3/stock-split/{symbol}</code>	Stock split history.
<code>/api/v3/analyst-estimates/{symbol}</code>	Analyst EPS/price targets.
<code>/api/v3/earnings-surprises/{symbol}</code>	Earnings surprises.
<code>/api/v3/earnings-calendar?from=YYYY-MM-DD&to=YYYY-MM-DD</code>	Upcoming earnings events.

Charts and historical price series

Endpoint	Description
<code>/api/v3/historical-chart/{interval}/{symbol}</code>	Historical prices; interval can be <code>1min</code> , <code>15min</code> , <code>30min</code> , <code>1hour</code> , <code>4hour</code> or <code>1day</code> .
<code>/api/v3/historical-price-full/{symbol}</code>	Full daily price history with dividends and splits.
<code>/api/v3/historical-price-full/{symbol}?serietype=line</code>	Price history simplified for plotting.
<code>/api/v3/historical-price/{symbol}?from=YYYY-MM-DD&to=YYYY-MM-DD</code>	Custom date range.

Economics

Endpoint	Description
<code>/api/v3/fed-funds-rate</code> , <code>/api/v3/treasury-rate</code> , <code>/api/v3/cpi</code> , <code>/api/v3/unemployment-rate</code>	U.S. macroeconomic series (Fed funds, treasury yields, CPI, unemployment, etc.).
<code>/api/v3/economic-calendar</code>	Upcoming macroeconomic releases.

Endpoint	Description
<code>/api/v3/state-unemployment/{state_code}</code>	State-level unemployment rates.
<code>/api/v3/sector-performance</code>	U.S. sector performance.

Earnings transcripts & news

Endpoint	Description
<code>/api/v3/earning_call_transcript/{symbol}</code>	Full earnings call transcript.
<code>/api/v3/earning_call_transcript/batch?symbol=...</code>	Batch transcripts.
<code>/api/v3/stock_news</code>	Market and company news.

Form 13F

Endpoint	Description
<code>/api/v3/form-thirteen-f/{cusip}</code>	13F holdings by CUSIP.
<code>/api/v3/form-thirteen-f/list</code>	List of funds filing 13F reports.

Limits

- **250 requests per day** on free plan ¹³; up to **4 parallel requests/second** suggested (unofficial).
- Only U.S. stocks and ETFs covered; premium endpoints require a paid key ¹⁵.

Polygon.io

Polygon.io offers granular U.S. market data (stocks, options, indices, forex, crypto) via REST and WebSockets. **Free tier** provides delayed data (end-of-day) and has a **limit of 5 API requests per minute** ¹⁶. Paid tiers unlock real-time data, additional asset classes and higher limits.

Reference endpoints (free)

Below are the reference/client methods from the official Python library (which call REST endpoints behind the scenes). Each corresponds to a REST path; free tier returns end-of-day data only. Parameters omitted for brevity.

Method / Endpoint	Purpose
<code>get_tickers</code> (<code>/vX/reference/tickers</code>)	List all tickers (stocks, ETFs, mutual funds, indices, crypto).
<code>get_ticker_types</code> (<code>/vX/reference/tickers/types</code>)	List ticker types (CS, ADR, ETF, etc.).

Method / Endpoint	Purpose
<code>get_ticker_details (/vX/reference/tickers/{symbol})</code>	Company information and fundamentals.
<code>get_option_contract (/vX/reference/options/{option_symbol})</code>	Get a single option contract's details.
<code>get_option_contracts (/vX/reference/options)</code>	List active option contracts for an underlying symbol ¹⁷ .
<code>get_ticker_news (/vX/reference/news)</code>	Latest news articles about a ticker ¹⁸ .
<code>get_stock_dividends (/vX/reference/dividends)</code>	Dividend history for a ticker.
<code>get_stock_splits (/vX/reference/splits)</code>	Stock split history.
<code>get_stock_financials_vX (/vX/reference/financials)</code>	Standardized financial statements (v2/v3).
<code>get_market_holidays (/vX/reference/holidays)</code>	U.S. market holidays.
<code>get_market_status (/vX/reference/market-status)</code>	Whether the market is open.
<code>get_conditions (/vX/reference/conditions)</code>	Condition codes for trades/quotes.
<code>get_exchanges (/vX/reference/exchanges)</code>	List stock exchanges and descriptions.

Price and aggregates endpoints (free tier returns end-of-day)

Endpoint	Description
<code>/v2/aggs/ticker/{symbol}/range/{multiplier}/{timespan}/{from}/{to}</code>	Historical aggregates (OHLCV) for a symbol; <code>timespan</code> can be minute, hour, day, week, month, quarter or year.
<code>/v2/trades/{symbol}</code>	Historical trades for a symbol (requires paid tier for intraday).
<code>/v2/last/trade/{symbol}</code>	Last trade for a symbol.
<code>/v2/last/nbbo/{symbol}</code>	Last NBBO quote (top of book) — real-time requires paid plan.
<code>/v2/snapshot/locale/us/markets/stocks/tickers</code>	Snapshot of the entire stock market (price, volume, etc.).
<code>/v2/snapshot/locale/us/markets/stocks/tickers/{symbol}</code>	Snapshot for a single ticker.
<code>/v2/reference/dividends</code>	Dividend announcements.

Endpoint	Description
<code>/v2/reference/splits</code>	Splits and reverse splits.
<code>/v2/reference/financials/{symbol}</code>	Standardized financial statement for a symbol.
<code>/v2/reference/earnings/{symbol}</code>	Historical earnings.

Options and other asset classes (free tier)

Endpoint	Description
<code>/v3/reference/options/contracts</code>	List options contracts with filters (underlying symbol, expiration date).
<code>/v3/reference/options/contracts/{symbol}</code>	Details for a specific option contract.
<code>/v1/open-close/{symbol}/{date}</code>	Open and close price for a symbol on a given date.
<code>/v2/aggs/grouped/locale/us/market/stocks/{date}</code>	End-of-day grouped daily bars for all tickers.
<code>/v2/aggs/ticker/{symbol}/prev</code>	Previous day's bar.

Rate limits

- Free tier: **5 requests per minute** ¹⁶.
- Bulk and real-time endpoints are disabled; only end-of-day data is provided.
- Premium tiers raise limits and enable real-time tick data and websockets.

Summary of Limits

Provider	Free-plan call limits	Notes
Alpaca	Unpublished; typical guideline ~200 REST requests/min. WebSocket limited to 30 symbols ² .	Only IEX feed (stocks) and indicative options/crypto feed ¹ .
Alpha Vantage	5 requests/minute, 500/day.	Premium keys raise limits; realtime intraday and options require upgrade.
FRED	~120 requests/minute.	All endpoints free; registration required.
Finnhub	60 requests/minute overall; 900/min for market data; 300/min for fundamentals ¹¹ .	WebSocket limit of 50 symbols ¹² .
FMP	250 requests/day ¹³ .	Only U.S. data on free plan; premium endpoints excluded ¹⁵ .

Provider	Free-plan call limits	Notes
Polygon.io	5 requests/minute ¹⁶ .	Data is end-of-day; real-time data and higher limits require paid tier.

Note: The lists above capture the principal endpoints available in each provider's free tier. Minor variations or newly added endpoints may not be fully represented; consult each provider's official documentation for the most current details.
